CAREER OBJECTIVE

Aspiring Machine Learning & Generative AI Engineer with hands-on experience in RAG systems, agentic AI workflows, and multimodal LLM applications. Proficient in building production-ready solutions using LangChain and FastAPI, with a strong interest in scalable Generative AI systems. Passionate about solving real-world problems through intelligent, efficient, and user-centric AI applications.

EDUCATION QUALIFICATION

- **Bachelor of Engineering - Computer Science and Engineering (Artificial Intelligence & Machine Learning)**
CMR Institute of Technology, Bengaluru
CGPA: 9.45, 2027 (Pursuing)
- **12th Grade – Science**
Vagdevi Vilas Institutions, Bengaluru
89.2%, 2023
- **10th Grade**
Vagdevi Vilas Institutions, Bengaluru
89%, 2021

TECHNICAL SKILLS

- **Programming Languages:** C, Java (8/17/21), Python 3.x
- **Operating Systems:** Windows, MacOS
- **Database:** MySQL, MongoDB, SQLite
- **Version Control:** Git, GitHub
- **Frameworks:** Scikit-Learn, NumPy, Pandas, Matplotlib, Seaborn, LangChain, TensorFlow, HuggingFace Transformers
- **Backend Technologies:** FastAPI, REST APIs
- **Web Technologies:** HTML, CSS, JavaScript
- **Generative AI:** Retrieval Augmented Generation (RAG), LoRA Fine-tuning of LLMs, Model Context Protocol Servers (MCPs), LLM Deployment on platforms like Railway & Render

PROJECTS

- **MindPad AI - AI Research & Study Assistant Platform**
 - Designed and developed a full-stack AI research assistant capable of document understanding, AI chat, mind map generation, podcasts, interactive learning tools, delivering an integrated study ecosystem.
 - Implemented context-aware interactions using Retrieval-Augmented Generation (RAG) with dynamic chunking and persistent memory, enabling intelligent, scalable, and history-aware conversations across sources.
 - Integrated with real-time Notion notes connectivity along with Razorpay payments integration.
 - **Tech Stack:** React (Frontend), FastAPI (Backend), Groq Cloud – LLaMA 3.3:70B (LLM), LLaMA 4 Scout (Vision), LangChain (RAG), React D3 (Mind Maps), MoviePy (Video Generation), FAISS (Vector DB), all-MiniLM-L6-v2 (Embeddings), multilingual support with PDF, web, and audio ingestion.
 - **GitHub:** github.com/Priyanshu-Madhup/Mindpad-AI

- **Stock Market Prediction System**
 - Built a machine learning-based stock forecasting application capable of predicting the next month's stock prices using one year of historical market data.
 - Enhanced predictive insights by integrating AI-driven financial trend analysis and personalized investment suggestions to support informed decision-making.
 - **Tech Stack:** Python, Random Forest, YFinance API, Google Gemini AI, Tkinter (GUI).
 - **GitHub:** github.com/Priyanshu-Madhup/stock-market-predictor
- **Claire - AI-Powered Voice Assistant**
 - Developed a real-time AI voice assistant with wake-word activation and Siri/Alexa-style animations, delivering natural conversational interactions through a GUI-based WebView interface.
 - Enabled intelligent task automation including file and application execution, web search, and live weather forecasting to create a fully functional desktop assistant experience.
 - **Tech Stack:** Python, Tkinter (WebView GUI), LLaMA 3.3:70B (Groq Cloud), Google Gemini API, Serper API (Web Search), OpenWeather API (Weather), OS & Subprocess Automation.
 - **GitHub:** github.com/Priyanshu-Madhup/claire

CO-CURRICULAR ACTIVITIES

- **Hackathons**
 - BrinHack - National level 24hr Hackathon, Brindavan College of Engineering
 - Tech Triad - National level 12hr Hackathon, Dayananda Sagar Academy of Technology
 - Repo Genesis - National Level 24hr Hackathon, BMS College of Engineering
 - Fulll Stack Fiesta - Inter-department Hackathon, CMR Institute of Technology
- **Certifications**
 - Building RAG Agents with LLMs - NVIDIA Deep Learning Institute (Nov 2025)
Certified by NVIDIA Deep Learning Institute in building end-to-end RAG agents with LLMs, covering embeddings, semantic search, agent orchestration and deployment using LangChain.
 - Python for Data Science and Machine Learning Bootcamp - Udemy (Dec 2024)
Covered Python programming, data analysis, supervised/unsupervised ML, and deep learning applications.
 - Generative AI and ChatGPT - LinkedIn Learning (June 2024)
Explored prompt engineering, conversational AI, and practical use cases of large language models.

AWARDS AND ACHIEVEMENTS

- Bug Bounty Awardee - Discovered and responsibly disclosed authentication and authorization vulnerabilities in Paytm and FreeCharge (fintech), receiving cash awards totaling ₹10,000, involving platform security and user protection.
- Demonstrated leadership skills as Technical Head of the HackerEarth club at CMRIT.
- 1st Place at Membrain Hackathon by AlphaNimble; 4th winner and in honorable mentions in Repogenesis Hackathon, BMSCE
- Top 10 national level finalist at Vivriti capital hackathon at IIT Hyderabad.

PERSONAL DETAILS

Date Of Birth	: 05/06/2005
Gender	: Male
Nationality	: Indian
Language	: English & Hindi
Hobbies & Interests	: Playing Basketball, Badminton and Table Tennis, Travelling & Developer technical blogs
